TAHA GILLANI

403-803-0867 | taha.gillani@uleth.ca | tahagillani.ca | linkedin.com/in/taha-gillani

EDUCATION

Bachelor of Science in Computer Science *Expected Graduation: 2027*

University of Lethbridge *GPA: 3.8 / 4.0*

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Artificial Intelligence, Machine Learning Foundations

Software Development Diploma *Graduated: April 2024*

Southern Alberta Institute of Technology (SAIT)

TECHNICAL EXPERIENCE

Full Stack Developer / Software Engineer Intern *June 2024 – August 2025*

Imperio Property Management LTD. *Calgary, AB*

- Optimized backend responsiveness by 25% and scaled system architecture to support 10k+ concurrent requests by engineering full-stack web applications using React, Node.js, Express, and MongoDB.
- Designed and deployed secure REST APIs with strict validation schemas under Agile sprint timelines, reducing data latency by 30% and protecting traffic for thousands of active application queries.
- Streamlined local development and integration testing frameworks by containerizing microservices with Docker and managing codebases via Git, reducing developer environment onboarding time by 40%.
- Collaborated with multi-disciplinary stakeholders to resolve architectural performance constraints, draft clear systems documentation, and optimize cloud infrastructure tracking.

Commissioned Sales Representative *October 2024 – August 2025*

Visions Electronics *Calgary, AB*

- Generated over $400K in product and systems revenue through clear technical communication, comprehensive hardware evaluations, and tailored client consultations.
- Utilized data analytics tools to log technical system configurations, analyze quarterly execution trends, and manage performance metric pipelines.
- Recognized as a top-performing nationwide accessory specialist by translating complex technical and structural parameters into high-impact customer solutions.

TECHNICAL SKILLS

Languages	Python, Java, C++, JavaScript, SQL, Lua, VBA
Frameworks & Backends	React, Node.js, Express, Django, FastAPI, Supabase, Firebase
Databases & Storage	PostgreSQL, MySQL, MongoDB, DynamoDB, NoSQL
Cloud & DevOps	AWS, Docker, Kubernetes, Vercel, Git, CI/CD Pipelines, Agile/Scrum
AI & Automation	TensorFlow, PyTorch, Amazon SageMaker, NumPy, Pandas, Model Context Protocol (MCP)
Tools & Enterprise	Microsoft Power BI, PowerApps, SAP, Microsoft Office Suite

PROJECTS & PORTFOLIO

More projects on tahagillani.ca

Interactive Physics Sandbox Portfolio *tahagillani.ca*

- Architected an interactive dark-themed web platform deployed via Vercel implementing complex vector physics and rigid-body collision detection algorithms from scratch in JavaScript.
- Utilized localized multi-agent development loops and custom automation scripting setups to manage platform refactoring and modular integration testing.

Crypto Live AWS Dashboard *CoinGecko Crypto Dashboard*

- Engineered a cloud-based financial data pipeline using Python and the Serverless Framework to automate the continuous ingestion and retrieval of live market data streams.
- Architected a NoSQL storage layer using Amazon DynamoDB to handle high-throughput write operations, enabling real-time indexing and low-latency querying of volatile financial asset data.

Concurrency & Computer Engineering Simulator *Dining Philosophers*

- Developed a multi-threaded execution simulator in C and C++ compiled via CMake to model thread safety and core micro-resource allocations on standard hardware.
- Applied scope-bounded RAII patterns and object-oriented paradigms to completely prevent memory leaks while utilizing system mutex locks to isolate and eliminate deadlocks.

VOLUNTEERING

PCA – (Pakistani Canada Association)
