

TAHA GILLANI

Calgary, AB | 403-803-0867 | taha@tahagillani.ca
Portfolio: tahagillani.ca | LinkedIn: linkedin.com/in/taha-gillani

PROFESSIONAL SUMMARY

Computer Science student entering 4th year with a 3.8 GPA. Actively seeking Co-op or Internship opportunities for 2026–2027 terms.

TECHNICAL & PROFESSIONAL SKILLS

Languages & Systems	Python, Java, C++, C, JavaScript, SQL, MySQL, Postgres, OOP, RAIL, CMake, Lua, PC Architecture & Hardware Assembly
Web & Frameworks	React, Node.js, Express, Django, MERN Stack, Supabase, MongoDB, NOSQL, FastAPI, API, REST APIs, JSON, Firebase
Cloud & DevOps	AWS, Azure, Vercel, Docker, Git, CI/CD, Agile, GCP, Kubernetes, DynamoDB
AI & Machine Learning	TensorFlow, PyTorch, Sagemaker, DeepLearning, NumPy, Pandas, Prompt Engineering, MCP
Finance & Tools	Finance, SAP, PowerBI, PowerApps, MS Office365 Suite
Team Competencies	Client Relations, High-Performance Team Dynamics, Technical Documentation

TECHNICAL EXPERIENCE

Imperio Property Management LTD. – Full Stack Developer / Software Engineer Intern

June 2024 – August 2025 | Calgary, AB

- Optimized backend responsiveness by 25% and scaled system architecture to support 10k+ concurrent requests by engineering full-stack web applications using React, Node.js, Express, and MongoDB.
- Designed and deployed secure REST APIs with JSON formatting schemas under strict Agile sprint timelines, reducing data latency by 30% and securing traffic for thousands of active application queries.
- Streamlined local development and integration testing frameworks by containerizing microservices with Docker and managing codebases via Git, reducing developer environment onboarding time by 40%.
- Collaborated with multi-disciplinary stakeholders to resolve performance constraints, document requirements, and optimize cloud infrastructure.

Visions Electronics – Commissioned Sales Representative

October 2024 – August 2025 | Calgary, AB

- Generated over \$400K in product and systems revenue through clear technical communication, hardware product knowledge, and tailored client consultation.
- Utilized MS Office365 applications to log configuration specifications, analyze personal metrics, and coordinate high-volume data coordination workflows.
- Recognized as a top-performing nationwide accessory specialist by translating complex hardware parameters into user-focused solutions.

PROJECTS & PORTFOLIO

*ADDITIONAL SOFTWARE ENGINEERING REPOSITORIES VIEWABLE AT TAHAGILLANI.CA

Interactive Physics Sandbox Portfolio (tahagillani.ca)

Personal Infrastructure Core

- Architected an interactive web environment built in JavaScript and deployed via Vercel implementing complex vector physics and rigid-body Collision Detection algorithms.
- Utilized multi-agent development automation loops guided by custom Prompting structures to optimize interface refactoring and modular testing.

Full-Stack Web Application (SkillShare Platform)

Full Stack Ecosystem Project

- Built a responsive peer matching platform leveraging React for client interfaces and Supabase paired with SQL for persistent data storage.
- Constructed modular API endpoints and integrated security verification interceptors to defend backend read/write traffic.

Concurrency & Computer Engineering Simulator (Dining Philosophers)

Low-Level Systems Architecture

- Developed a multi-threaded execution simulator in C and C++ compiled via CMake to model thread safety and micro-resource allocations on standard PCs.
- Applied scope-bounded RAIL patterns and OOP architectures to prevent memory leaks, utilizing system mutex locks to eliminate deadlocks.

EDUCATION

Bachelor of Science in Computer Science

Expected Graduation: 2027 | GPA: 3.8 / 4.0

University of Lethbridge – Calgary, AB

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Artificial Intelligence, Machine Learning Foundations

Software Development Diploma

Southern Alberta Institute of Technology (SAIT) – Calgary, AB

LANGUAGES

English, Urdu, Hindi, Punjabi
