Currently obsessed with agentic AI. I create data-driven digital products that drive a competitive edge.

PROFESSIONAL EXPERIENCE

Full Stack Engineer — Imperio Property Management LTD. Calgary, AB | June 2024 – August 2025

- Ran daily operations 100% online across 20+ rental units by building an internal web app (React, Node.js, MongoDB) that let staff track leases, maintenance tickets, and tenants in one place.
- Stopped duplicate records and communication delays across teams by engineering automated database triggers that instantly synced live property updates across all staff dashboards.
- Designed a REST API and reduced page-load time 35% by adding query caching
- Saved operations staff 10+ hours weekly in manual admin chores by sitting down directly with property managers and turning their everyday bottlenecks into automated software features.

Commissioned Sales Specialist — Visions Electronics Calgary, AB | October 2024 – August 2025

- Generated over $400,000 in gross revenue across home theater, audio, and protection packages by solving customer setup problems, being Awarded as one of the top accessory sales reps in Canada.
- Translated complex hardware specs and audio architecture into clear, practical benefits for buyers, building the trust that drove repeat customers and word-of-mouth referrals.
- Maximized transaction profitability by tracking daily margin reports and attachment rates, systematically pairing high-margin accessories and warranties to consistently exceed revenue targets.

TECHNICAL PROJECTS

`view on tahagillani.ca`

Crypto Live AWS Dashboard | Python, AWS Lambda, DynamoDB, Serverless

- Built a serverless pipeline in Python deployed on AWS Lambda that constantly pulls live crypto prices and market data from the CoinGecko API without server maintenance.
- Set up Amazon DynamoDB tables to store keys and ensure high frequency updates. Currently supporting Bitcoin and Ethereum
- Connected the database to a web dashboard showing live price swings, volume metrics, and custom threshold alerts for price spikes and dips.

TradeAI — Autonomous Market & Trading Agent | Python, LLM Agents, Financial APIs, Webhooks

- Eliminated hours of manual viewing across the S&P 500 by building an automated Python pipeline that pulls real-time price feeds, earnings transcripts, and financial news via market APIs.
- Hooked up an autonomous LLM agent that evaluated trends within the market, calculating risk-to-reward ratios and dispatching structured trade alerts and would buy/sell autonomously
- Set up another agent that would browse socials/internet to predicate future trends and report them back through Discord

Hatewatch — NFL Analytics & Automated Tracking Engine | Python, AI Agents / LLMs, REST APIs, PostgreSQL, React

- Built a full-stack tracking engine that pulls live NFL stats and game feeds via Sportsradar API, zeroing in on everything that goes wrong: turnovers, blown plays, penalty yards, and negative EPA plays.
- Built an AI agent that fetches game logs and player stats, sending automated updates whenever a player commits a turnover, penalty, or blown play.
- Wrote scoring algorithms in Python to calculate real-time "liability ratings" for players and teams, displaying live rankings on a custom React dashboard.

TECHNICAL & PROFESSIONAL SKILLS

Languages & Core: Python, JavaScript (Node.js, Express, React), SQL (PostgreSQL, MySQL), C++, HTML/CSS, JSON, Prompt Engineering, VBA, AI Engineering, Lua

Cloud, Data & AI Systems: LLMs & SLMs, RAG Pipelines, Agentic Workflows & Tool Calling, AWS (Lambda, DynamoDB, SageMaker), Docker, Git, Linux/Bash, PyTorch, Copilot Studio

Enterprise & Analytics: Microsoft 365, Power BI, Power Automate, Microsoft Dataverse, SAP

Business Foundations: Profit Margins & Commission Splits, Client Sales, Financial Accounting, Process Automation, Trading Models

EDUCATION

University of Lethbridge — Bachelor of Science in Computer Science (CGPA: 3.8/4.0) Calgary, AB | 2025 – Present

Southern Alberta Institute of Technology (SAIT) — Software Development Diploma Calgary, AB | Graduated April 2024

Southern Alberta Institute of Technology (SAIT) — Bachelor of Business Administration(Coursework) Calgary, AB | 2021

CERTIFICATIONS & INTERESTS

Certifications: Microsoft Office Specialist (Excel, Word)

Community: Volunteer with Pakistani Canada Association (PCA) assisting in community events and youth programs.

Interests: NFL analytics, combat sports & UFC, pickup basketball, building side projects and games
