

TAHA GILLANI

Calgary, AB | 403-803-0867 | tgillani2020@gmail.com

PROFESSIONAL SUMMARY

Highly motivated 4th year Computer Science student with a 3.8 GPA and practical experience spanning full-stack development, software engineering, computer engineering concepts, and high-performance Sales environments. Proficient in architecting scalable web applications using the MERN stack, designing robust RESTful APIs, and utilizing modern DevOps tools including Git and Docker across AWS and Azure environments. Proven analytical problem-solver and collaborative team player seeking a targeted Co-op or Internship opportunity across all technology domains, including Artificial Intelligence (AI/ML), Full-Stack Development, Software Engineering, Computer Engineering, Data Science, or general IT roles.

TECHNICAL & PROFESSIONAL SKILLS

Programming Languages	Python, Java, C/C++, JavaScript, SQL
Web Technologies	Node.js, React.js, Express.js, ASP.NET, Django, Angular, Bootstrap, MERN Stack
Databases & Cloud	MongoDB, MySQL, MS SQL Server, AWS, Microsoft Azure
Developer Tools	Git, Docker, Power BI, PowerApps, Office365, Excel
Sales & Finance Skills	Consultative Selling, Customer Relationship Management (CRM), Revenue Generation, Financial Analysis, Market Equilibrium Tracking, Cost Optimization
Communication Skills	Stakeholder Engagement, Cross-functional Collaboration, Client Relations, Technical Presentations & Documentation
Core Competencies	Full-Stack Development, Software Engineering, Computer Engineering, REST API Design, Agile Methodologies, UI/UX Optimization, Object-Oriented Programming (OOP)

TECHNICAL EXPERIENCE

Imperio Property Management LTD. – Full Stack Developer / Software Engineer	<i>June 2024 – August 2025 Calgary, AB</i>
--	--

- Engineered and optimized full-stack web applications utilizing the MERN stack, significantly enhancing system scalability, performance, and user engagement.
- Designed and deployed secure RESTful APIs to facilitate seamless, low-latency communication between decoupled front-end and back-end architectures.
- Streamlined local development and deployment pipelines by containerizing applications with Docker and managing strict version control via Git.
- Collaborated directly with cross-functional stakeholders to debug critical issues, minimize system downtime, and refine technical workflows.
- Elevated user interface responsiveness and cross-browser reliability through rigorous component testing and iterative debugging.

PROJECTS

Full-Stack Web Application (SkillShare Platform)	<i>Personal Project</i>
---	-------------------------

- Built a responsive web application leveraging the MERN stack to facilitate peer-to-peer skill sharing.
- Managed end-to-end source control using GitHub and successfully configured automated cloud build pipelines on Vercel and Render.
- Integrated secure backend routes and applied object-oriented principles to ensure clean, maintainable, and scalable code architecture.

Concurrency & Computer Engineering Simulator (Dining Philosophers)

Academic Project

- Developed a low-level synchronization simulation in C to solve the classic Dining Philosophers operating systems problem.
- Implemented multithreading, mutex locks, and condition variables to analyze and eliminate race conditions, memory leaks, and deadlocks.
- Practiced deep algorithm analysis to evaluate system memory management and thread performance efficiency.

PROFESSIONAL EXPERIENCE

Visions Electronics – Commissioned Sales Representative

October 2024 – Present | Calgary, AB

- Generated over **\$400K** in product and accessory sales by translating complex technical specifications into consumer-focused value propositions.
- Recognized as a top-performing accessory salesperson across Canada for consistently outperforming aggressive regional sales quotas and growth targets.
- Cultivated a loyal client base through proactive relationship management, driving consistent repeat business and high-value customer referrals.

EDUCATION

Bachelor of Science in Computer Science

Expected Graduation: 2027 | GPA: 3.8 / 4.0

University of Lethbridge – Calgary, AB

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Artificial Intelligence

Software Development Diploma

Completed: July 2024

Southern Alberta Institute of Technology (SAIT) – Calgary, AB

LEADERSHIP & ACTIVITIES

Teamwork & Collaboration: Active competitive basketball player, applying strong on-court communication, quick tactical adjustment, and collaborative team dynamics to technical project management environments.

Continuous Learning: Passionate about emerging technologies, regular participation in tech communities, and experimenting with modern programming frameworks.
